Connect the Future.

We provide valuable solutions that weaving the future.

Connect the Future.

We provide valuable solutions that weaving the future.

UACJ Trading Corporation provides the products and services required for your business, along with optimal solutions.

Our Business Domains

We support manufacturing that adds richness to people's lives from the perspective of sustainability.
Providing broad support across various fields.

BUSINESS

PRESIDENT'S MESSAGE

Greetings from the President

KATO MASATO

Challenge to New Value

With our sincerity and future-oriented mindset, we boldly take on challenges to deal with changes in the environment surrounding the world and issues that companies are required to tackle in the society in the future.

Furthermore, it is our mission to create new value.

Under the concepts of “new regions,” “new sectors,” “new business domains,” and “new technologies,” we hope to generate new value and contribute to building a sustainable and prosperous society together with all the stakeholders relating to our company by forming a stronger business foundation through engagement improvement and development of lively workplaces as well as propelling forward activities with an eye on the future ahead.

ABOUT US

Company Profile

Corporate Name	UACJ Trading Corporation
Representative Director	Masato Kato
Date of Foundation	November 28, 1947
Capital Stock	1.5 billion yen
Number of Employees	130
Transaction Volume	97.8 billion yen
Principal Shareholder	UACJ Corporation
Financing Banks	Sumitomo Mitsui Banking Corporation, Sumitomo Mitsui Trust Bank, Limited, etc.
Head Office	Osaka Head Office / Tokyo Head Office
Offices	Sales office : Nagoya / Offices : Ashikaga, Kusatsu (Shiga Prefecture), and Makati (Philippines)
Affiliated Companies in Japan	Izumi Metal Corporation / Kamakura Industry Co., Ltd.
Affiliated Companies Overseas	Thailand, Shanghai, Kunshan, Dalian, Czech, the United States, and Poland
Certifications/ISO	Acquisition of ISO 9001 and ISO 14001 certifications(The ISO 9001 certification is applied only to the sales department.) / AS9120(at our second sales department in Osaka)

UACJ's Corporate Philosophy

Contribute to a prosperous and sustainable society with technologies that bring out the innate power of Materials.

Our Mission

UACJ Trading Corporation earns the trust of society and clients through our environmentally-friendly corporate activities and contributes to raising the value of the UACJ Group in the value chain.

- 1 We maximize profit of our clients and the UACJ Group by providing eco-friendly and high-quality products and logistics services.
- 2 We create lively workplaces in which workers feel comfortable through open communication.
- 3 We make our business foundation stronger so that our employees can grasp changes in the social environment and needs from a global perspective and positively take on challenges to attain goals and tackle issues.
- 4 We sincerely fulfill clients' expectations and build up trustworthy partnerships.

Thermal

Thermal (Heat Management)

As our lifestyles and environment change, thermal management is becoming increasingly important. We offer optimal products and solutions for these diversified “thermal” challenges from all angles.

Here for details

Reasons we are chosen

Proposing optimal materials unconstrained by conventional frameworks

We offer optimal materials to meet individual thermal challenges based on our proven track record of handling diverse materials in Japan and overseas.

Customization to meet your needs

We propose “materials,” “processed products,” “finished products,” etc., in a customized form depending on the application and design.

Additional development support

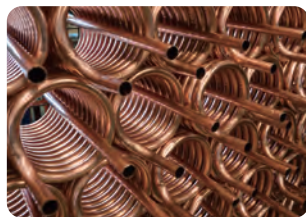

Utilizing the strength as a manufacturer-affiliated company, we provide support in various aspects such as material development, thermal analysis, examination, and assessment.

Examples of areas where we propose products

Products related to the HVAC/refrigeration cycle

Evaporators & Condensers

Heat exchangers for water heaters

Compressors

Heaters

Micro-channel heat exchangers

Fan motors

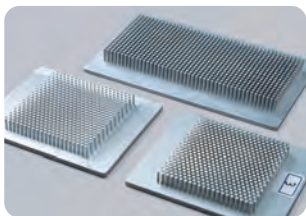

Products related to FA/industrial equipment

Thermostat

Heat pipes

Heat sinks

Shell and tube heat exchangers

CPU cooler

Motors

Mobility

Mobility

The movement of people and goods is indispensable for our day to day living, and even in the industrial world, transformation is occurring due to new technologies on a daily basis. In order to meet the diversifying needs in the mobility field, we offer valuable proposals that go beyond the constraints of materials.

Here for details

Reasons we are chosen

Various solutions to meet the needs for weight reduction

We contribute to various development projects aimed at energy conservation and lessening environmental burden by proposing lightweight materials and processed products centering on aluminum.

Wide-ranging materials we can propose

We propose all kinds of materials from Japan and overseas, not limited to non-ferrous metals, by utilizing the network with partners that we have built up independently.

Additional development support

Utilizing the strength as a manufacturer-affiliated company, we provide development support such as material development, structural analysis, product design, and assessment.

Examples of areas where we propose products

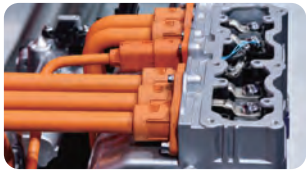

Automobile related

Cooling equipment components

Undercarriage parts

Bus bar modules

Motor components

Batteries

Window frames

Electrical parts

Engine parts

Aerospace

Based on results in the aerospace domain, we offer high quality and high value-added services.

01 Proposal for aerospace standard parts and specialty materials

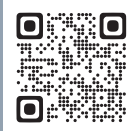

02 AS 9100/Nadcap in Japan and overseas Proposal for certified factories and processing manufacturers

03 Proposal for a factory certified by a major aircraft manufacturer

Development Support

Development Support + Additional Value

Combining the specialized development support in which our strength as a manufacturer-affiliated company is utilized with the global manufacturing and distribution networks that our company has formed by ourselves beyond the scope of non-ferrous metals, our company helps deal with a broad range of issues relating to development in a one-stop manner.

Here for details

SUSTAINABILITY

Sustainability

We at UACJ Trading hold a strong responsibility for environmental measures in our corporate activities and aim to build a sustainable supply chain.

Selection of returnable resources and products

Building a horizontal recycling scheme

Handling logistics with reduces CO2 emissions

Offering products made of recycled materials

Here for details

Our strengths We offer one-stop and optimal development support that fully utilizes the value of materials.

Specialized development support by a material manufacturer

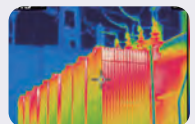

Comprehensive development support that can be offered only by a manufacturer-affiliated company

Material development

Analysis

Assessment

Examination

Our proprietary manufacturing network

A diverse range of proposals that transcend conventional boundaries

Joining

Surface treatment

Molding

Machining

Logistics services in which our company has extensive experience

Borderless and timely global logistics

Export, import, and logistics agency services

Inventory control

Examples of support provided

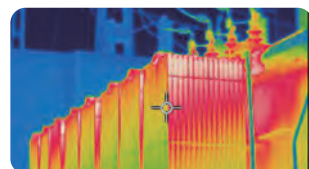

Material development

- Development and selection of alloys
- Material design and trial production

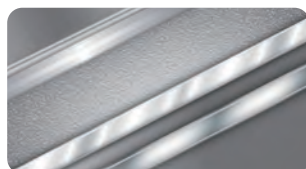

Joining

- Vacuum brazing
- FSW / Joining dissimilar metals / Eutectic joining/Laser welding

Assessment

- Assessment of corrosion resistance, reliability, etc.
- Performance evaluation

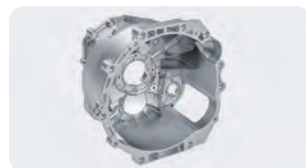

Surface treatment

- Plating / Coating / Anodizing / Anti-corrosion treatment / A variety of coating
- Embossing / Pear skin finishing / Etching / Blasting and others

Analysis

- Composition analysis
- Shape analysis (cross section, 3D scanning, etc.)
- Proposal for materials and processing based on data and assessment results

Processing / Molding

- Cutting / Machining / Ultra-precision processing
- Press molding / Bending / Extrusion / Forging / Slitting/Rolling
- Casting (Sand mold / Die casting / Lost-wax casting, and others)

Sustainability of the UACJ Group

Passing down a "Lighter World" over the next century

Aluminum is an essential material that supports our daily lives. It is a material that is freely transformable in its shape and has unlimited potential. It can be infinitely recycled as the same product, which is a unique characteristic that differentiates aluminum from other materials. Simply put, aluminum is the sustainable material of choice.

The UACJ Group has both cutting-edge technologies and seasoned expertise to realize aluminum's full potential as a material.

This wisdom and passion has been built up over 100 years, and with it, UACJ seeks a future in which the Earth will continue to be beautiful and bountiful. We are resolved to grow businesses that are environmentally friendly,

and committed to solve the various challenges of society that we face across the globe.

We contribute to create a healthy and harmonious society where everyone can feel Well-being. Our employees value diversity inherent in society, and we look to harness this diversity to create synergies with our stakeholders and local communities.

A lighter tomorrow with aluminum. A beautiful planet and a sustainable society for the next generation of the future. These principles are what the UACJ Group believes the "Lighter World" is all about.

UACJ Group Sustainability Policy

01

Contribute to sustainability through technologies and innovation

The UACJ Group shall contribute to the sustainability of society and the global environment by applying the technologies and expertise it has accumulated over its history to offer innovative solutions.

02

Work together with stakeholders

The UACJ Group shall forge partnerships and collaborate with a wide range of stakeholders and people across society in its efforts to help make the world more sustainable through its business activities.

03

Respect the individuality of diverse members

The UACJ Group shall take steps to ensure that the individuality of its diverse members is respected, regardless of their nationality, gender, age, disabilities, or other characteristics, and provide them with opportunities to apply their individual knowledge and skills to help devise innovative solutions.

Passing down a "Lighter World" over the next century

Our approach to the environment for realization of a "Lighter World" 100 years from now

For a beautiful and bountiful earth that will last for years to come

We will contribute to the creation of a sustainable society with loving care for our lush blue Earth through exploring further potential of aluminum.

Our approach to well-being for realization of a "Lighter World" 100 years from now

A healthy and harmonious society where everyone can feel well-being

We will contribute to the creation of a society in which each individual can feel healthy and happy, and in which this happiness will spread to all people.
